Location Intelligence AI

AI based Service provides Hotspot maps around the specified geo location by using unstructured smart phone data points to identify sensitive investigation in the area of

- LAW ENFORCEMENT

- KIDNAP PREVENTION AND RESPONSE

- BORDER SECURITY OPERATIONS

- CRIMINAL INVESTIGATIONS

IRI - Data Masking, encryption….

● Data discovery and masking for Databases (relational and NoSQL), documents (PDF, Word, PowerPoint), Excel, text files, image files, IoT feeds, and all forms of data in transit, and at rest.

● IRI data masking software can classify, discover, and consistently anonymize sensitive information in structured, semi-structured, and unstructured sources.

● Multiple search methods and masking functions (including redaction, format preserving encryption, hashing, pseudonymization, blurring, and tokenization) target and protect sensitive data across the enterprise.

● Work with third party SIEM, test data virtualization, data governance, and encryption key management tools. Also re-ID risk scoring, database sub setting, and smart data synthesis features in the Voracity suite.
